

ENDOVASCULAR TREATMENTS OF PAD

**NEW TREATMENT POSSIBILITIES WITH DAART
(DIRECTIONAL ATHERECTOMY PLUS ANTI-RESTENOTIC THERAPY)**

TIPS AND TRICKS ON NEW DEVICES AND TECHNIQUES

Tuesday, March 10th, 2020, at Hirslanden Clinique des Grangettes,
7 Chemin des Grangettes, 1224 Chêne-Bougeries.

8h00	Welcome Salle de conférence principale
8h30	First scheduled case
10h00	Second scheduled case
12h00	Lunch
13h00	Third scheduled case
14h30	Fourth scheduled case
16h30	Round table discussion, key takeaways, conclusions Salle de conférence principale
17h30	Closure of the workshop

This workshop is accredited by the by the Société Suisse d'Angiologie up to 8 credits.

This program is supported by:

Medtronic

**Boston
Scientific**

1911-1918

Dear Colleagues,

We are pleased to invite you to the « Endovascular treatments of PAD Workshop », which will be held at Hirslanden Clinique des Grangettes.

In the last decade, peripheral endovascular interventions have increased worldwide. Thanks to new devices and especially to new revascularization techniques, complex, as well as very complex lesions, are increasingly treated percutaneously. The endovascular approach is nowadays considered as the first line treatment option in many centers, when surgery is only reserved in cases of endovascular failure.

The aim of this workshop is to:

- Get the essential tips and tricks of complex peripheral interventions from the medical and catheterization lab personnel's point of view
- Discuss about endovascular material and techniques, in order to safely and efficiently start or improve any endovascular activity
- Discuss about new techniques and dedicated devices used to treat complex TASC C-D lesions

Robert F. Bonvini M.D., interventional cardiologist and angiologist at Hirslanden Clinique des Grangettes, will first develop different theoretical dimensions. A visit of the catheterization-lab with a peripheral material review will then be conducted along with four practical endovascular cases.

This conference is opened to interventional radiologists, cardiologists, angiologists and vascular surgeons. We look forward to welcoming you at Hirslanden Clinique des Grangettes.

Robert F. Bonvini M.D.
